

WILLIAM GALEANO

JUNIOR SOFTWARE DEVELOPER | PYTHON, JAVA & FULL-STACK WEB DEVELOPMENT

Bogotá, Colombia | 319 264 5738 | will21@hotmail.es | LinkedIn | github.com/URANOOB

PROFESSIONAL PROFILE

Junior Software Developer and Software Engineering student with hands-on experience building web applications, automation tools, and data-processing solutions. Portfolio includes a Python CLI for image and UV extraction, two responsive Next.js applications, and a Java application that generates, processes, and classifies sales data. Currently develop and maintain the Inglés Pa' La Paz platform, covering reusable interfaces, API routes, security controls, SEO, deployments, debugging, and technical documentation. Previous experience includes PHP, WordPress, SQL, CRM maintenance, IT support, and bilingual troubleshooting. English C1.

CORE COMPETENCIES

Python Development | Java & Spring Boot | JavaScript & TypeScript | React & Next.js | SQL & Data Processing | REST API Fundamentals | Git & GitHub | Debugging & Testing | Responsive UI | Linux & CLI | Technical Documentation | English C1

SOFTWARE DEVELOPMENT EXPERIENCE

Full Stack Software Developer / Volunteer

Inglés Pa' La Paz | 2026 - Present | inglespalapaz.com

- Develop and maintain a public-facing educational platform using Next.js, React, TypeScript, Tailwind CSS, and reusable UI components.
- Implemented API routes for chatbot communication and dynamic experience galleries, including input validation, safe path handling, request timeouts, and basic rate limiting.
- Built responsive, interactive sections and navigation with attention to accessibility, usability, and consistent behavior across desktop and mobile devices.
- Configured metadata, canonical URLs, Open Graph, robots, sitemap, analytics, and deployment workflows for production readiness.
- Diagnose UI, application, and deployment issues through reproduction, code review, linting, builds, and validation.
- Manage Git/GitHub workflows and translate requirements from educators and community collaborators into practical technical tasks.

Software Programmer

Ingenio Empresarial Integral SAS | Nov 2018 - Mar 2019

- Supported and enhanced business websites using PHP, WordPress, HTML, CSS, JavaScript, plugins, themes, and content management tools.
- Maintained internal CRM features and SQL data, including bug fixes, data validation, database updates, and workflow improvements.
- Implemented software updates and reporting improvements to support internal operations and business users.
- Documented changes and worked with users to understand issues and deliver practical fixes.

SELECTED SOFTWARE PROJECTS

Atlas Splitter - Python Image and UV Processing CLI

Python, OpenCV, Pillow, Pydantic, pytest, CLI tooling | github.com/URANOOB/atlas-splitter

- Built a local CLI that splits texture atlases, extracts GLB/gITF regions using UV coordinates, and supports optional semantic grouping.
- Implemented image normalization, segmentation, mask cleanup, deduplication, PNG/PSD/JSON exports, diagnostics, automated tests, strict typing, and linting.

Data Generation and Classification - Java

Java 8, OOP, flat-file processing, CSV reporting | github.com/URANOOB/generacion-clasificacion-datos

- Created a Java application that generates product, seller, and sales datasets, reads structured text files, aggregates results, sorts records, and produces CSV reports.

FoodProject - Responsive Restaurant Web Concept

Next.js 16, React 19, TypeScript, Tailwind CSS | github.com/URANOOB/FoodProject

- Developed a modular restaurant landing experience with menu, location, contact, responsive navigation, reusable components, and structured JSON-LD data for local-business SEO.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, PHP, HTML5, CSS3

Frameworks & Platforms: React, Next.js, Spring Boot, Node.js, WordPress, Vercel

Data & Backend: SQL Server, relational databases, REST API fundamentals, JSON, CSV, file processing, data validation

Tools & Systems: Git, GitHub, Visual Studio Code, Ubuntu Linux, Bash, PowerShell, OpenCV, Pillow, pytest

Practices: Responsive design, debugging, testing, version control, secure input handling, technical documentation

RELATED TECHNICAL EXPERIENCE

Blended Support Agent

Concentrix | Jul 2019 - Feb 2022

- Provided bilingual technical support through phone, email, and live chat, resolving platform, account, product, and service issues.
- Reproduced reported behavior, identified likely causes, guided users through clear solutions, and escalated complex cases with complete technical context.
- Maintained accurate CRM and ticket records and supported onboarding for new team members on tools, workflows, and troubleshooting methods.

Assistant Infrastructure Engineer - IT

NEXA BPO | Jan 2018 - Dec 2018

- Resolved technical tickets involving workstations, software, connectivity, network access, VoIP devices, and employee systems.
- Installed and configured computers, peripherals, and business applications while documenting recurring issues and escalation needs.

ADDITIONAL PROFESSIONAL EXPERIENCE

Senior Logistics Coordinator

Lean Group / Lean Solutions Group | Feb 2022 - Present

- Use TMS platforms, databases, advanced Excel, and reporting workflows to validate information, monitor time-sensitive operations, and support decisions.
- Investigate operational incidents, coordinate stakeholders, document outcomes, and resolve or escalate problems while protecting service continuity.

EDUCATION

Software Engineering: Politécnico Gran Colombiano, Bogotá | In progress | 2024 - Present

Programming and Software Development: SENA, Bogotá | Technician | 2018

English Diploma: American School Way, Bogotá | 2021

PROFESSIONAL DEVELOPMENT

- Backend Specialist Program - Java and Spring Boot | Alura / Oracle Next Education
- Software Developer Certification | SENA
- SQL Certification | SQL Master
- Linux, Git and GitHub Certifications | Platzi

LANGUAGES

Spanish: Native

English: C1 - Advanced spoken and written proficiency

French: A1 - Basic proficiency
