

WILLIAM GALEANO

LOGISTICS COORDINATOR | U.S. TRANSPORTATION OPERATIONS

Bogotá, Colombia | 319 264 5738 | will21@hotmail.es | linkedin.com/in/william-eduardo-galeano-ramirez-861549368

PROFESSIONAL PROFILE

Logistics operations professional with 4+ years of direct experience supporting U.S.-based transportation accounts across dispatch, appointment scheduling, load tracking, billing, carrier coordination, and exception management. Experienced in monitoring time-sensitive shipments, resolving delays and road failures, securing replacement capacity, maintaining accurate TMS and operational records, and serving as a reliable point of contact among drivers, carriers, customers, facilities, and internal teams. Advanced English (C1), strong Excel and data-management skills, and a technical background in SQL and software development that supports structured problem-solving and process improvement.

CORE COMPETENCIES

Daily Logistics Operations | Load Booking & Scheduling | Track & Trace | Delay Troubleshooting & Failure Recovery | Carrier and Driver Coordination | Appointment Management | Last-Minute Load Coverage | TMS / CRM Data Accuracy | LTL & FTL Operations | Billing Adjustments, TONU & BOL | Customer and Stakeholder Communication | Advanced Excel

PROFESSIONAL EXPERIENCE

Senior Logistics Coordinator

Lean Group / Lean Solutions Group | Feb 2022 - Present

- Coordinate day-to-day transportation operations for U.S.-based accounts including J.B. Hunt, Avenger Logistics, USA Truck, and DB Schenker, covering dispatch, appointment scheduling, billing, track and trace, and driver support.
- Monitor active loads and appointments, identify service risks, communicate delays proactively, and coordinate recovery actions for breakdowns, failed loads, missed appointments, and other time-sensitive exceptions.
- Secure and coordinate replacement capacity when loads fail, support last-minute booking needs, manage LTL and FTL movements, and keep drivers, carriers, customers, and internal teams aligned throughout execution.
- Maintain accurate operational records across TMS platforms, databases, and customer systems, including billing adjustments, TONU approvals, BOL updates, appointment details, and load-status documentation.
- Serve as a direct operational contact for drivers, carrier partners, customer teams, and distribution facilities, resolving conflicts while protecting on-time performance and service continuity.
- Use advanced Excel, structured reporting, and database handling to prioritize critical loads, organize follow-ups, and support faster operational decisions.

Blended Support Agent

Concentrix | Jul 2019 - Feb 2022

- Provided bilingual customer and technical support through phone, email, and live chat, managing high-volume requests with clear documentation and timely follow-up.
- Investigated service issues, identified root causes, escalated complex cases when required, and guided customers through practical resolutions while maintaining service standards.
- Maintained accurate case records in CRM systems and supported onboarding and training for new team members on tools, workflows, and customer handling.

Software Programmer

Ingenio Empresarial Integral SAS | Nov 2018 - Mar 2019

- Supported websites and internal CRM functions using PHP, WordPress, JavaScript, and SQL, including database updates, bug fixes, reporting improvements, and workflow maintenance.
- Worked with business information and internal systems to improve data access, system reliability, and operational support.

Assistant Infrastructure Engineer - IT

NEXA BPO | Jan 2018 - Dec 2018

- Resolved technical tickets related to workstations, software, network access, VoIP devices, and office equipment while maintaining clear documentation of recurring issues and infrastructure changes.
- Installed, configured, and prepared employee devices and supported basic network and system maintenance.

ADDITIONAL PROJECT EXPERIENCE

Full Stack Software Developer / Volunteer

Inglés Pa' La Paz | 2026 - Present

- Design and develop responsive web features with Next.js, React, TypeScript, Node.js, and SQL, integrating frontend, backend, and database workflows for a nonprofit educational initiative.
- Manage code organization, version control, deployment workflows, and scalable data structures, strengthening technical analysis and process-automation capabilities.

EDUCATION

Software Engineering: Politécnico Grancolombiano, Bogotá | University Student | 2024 - Present

Programming and Software Development: SENA, Bogotá | Technician | 2018

English Diploma: American School Way, Bogotá | 2021
